WHY SEAL CRAFT FOR ICE RESCUE?

PURPOSE-BUILT

The only airboat engineered from the ground up for ice rescue — not adapted from a water craft.

NOISE LEGAL

Averaging under 85 dB, it passes local noise ordinances. No restrictions.

GOES ANYWHERE

Crosses pressure ridges, open water, and thin ice that stops every other rescue vehicle.

READY TO RUN

Fully equipped SAR package with ladder, bumper, and light bars ready for deployment day one.

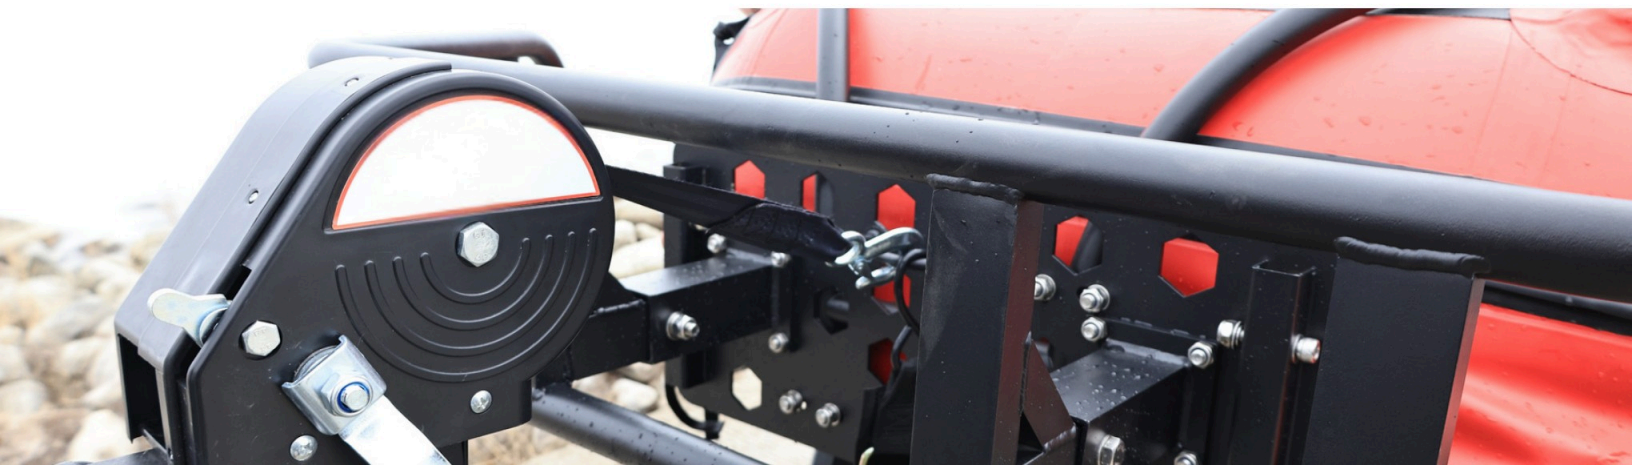

PURPOSE-BUILT FOR ICE & WATER RESCUE

ENGINEERED WHERE IT MATTERS MOST

TECHNICAL SPECIFICATIONS

HULL	16 Foot – Patent-Pending 3,000-Denier TPU, Rated -140°F
ENGINE	85HP AODES Fuel-Injected 4-Stroke, Radiator-Cooled
NOISE	Under 85dB – Passes Local Decibel Restrictions

CAPACITY	2-4 Adults
WEIGHT	Approx. 900 lbs
FUEL TANK	12-Gallon Extended Range
BOTTOM	UMHDPE Detachable Skid Plate
WARRANTY	1-Year Engine / 3-Year Hull Manufacturing Defects
TRAILER	Custom Roller Trailer with Loading Ramps – Included

THE ANSWER YOUR TEAM HAS BEEN WAITING FOR

Lightweight. Fast to Deploy.

At approximately 900 lbs, the Seal Craft SAR airboat is dramatically lighter than traditional rescue airboats – allowing faster deployment, easier transport, and access to areas heavier units simply can't reach. Launch quickly, operate efficiently, and reduce the manpower required to get on scene. **Starting at \$48,000**, it delivers serious rescue capability without the six-figure price tag of traditional airboats.

Built for Thin & Unpredictable Ice

Designed specifically for the conditions first responders actually face – thin or broken ice, open water, pressure ridges, and unstable surfaces where traditional aluminum boats and sleds fail. The patent-pending 3,000-denier TPU hull flexes to absorb impact, resists damage in extreme cold, and transitions seamlessly between ice, slush, and open water allowing for confident mission response no matter the conditions or season.
