COMPANY OVERVIEW

Seal Craft, LLC is a small business based in Devils Lake, North Dakota, focused on one mission: getting rescue teams safely across the water and ice conditions that stop conventional boats. Our platform is built around a patent-pending thermoplastic polyurethane (TPU) inflatable hull, configured with a quiet air drive for ice rescue or a jet drive for swift water and flood response. We serve fire, search and rescue, law enforcement, and emergency management agencies.

CORE CAPABILITIES

- **SAR Ice Rescue Airboat** for thin, broken, or shifting ice and open water
- **SAR 14' Swift Water Raft** with 25 hp jet drive for rivers, rapids, and floods
- **SAR 16' Swift Water Raft** with 40 hp jet drive for added capacity and power
- **Grant package support** including specifications, written quotes, and justification language
- **Municipal financing** options for U.S. government entities
- **Nationwide delivery** for a per-mile round trip fee; free pickup in Devils Lake, ND

DIFFERENTIATORS

- **Patent-pending 3,000 denier TPU hull** with safety valves and internal bladder system
- **TPU construction** resists abrasion, chemicals, and temperature extremes better than PVC or Hypalon, and flexes instead of breaking
- **SAR Ice Rescue Airboat** features five patent-pending innovations, including an ice brake, steering console, and low center of gravity, plus a quiet air drive engine under 85 dB
- **SAR Swift Water Raft (14' / 16')** uses a jet drive with no exposed propeller, giving teams shallow water access and safer navigation through debris fields
- **Ready to deploy** with a custom trailer included in every package
- **3-year craft warranty** against defects; 1-year on air drive engine components
